*As a result of the transfer of learners to LCB, due to a national provider not being allowed to continue with their provision, LCB (with SFA approval / employer choice) took on current commitments, residual funding & previous funding rates to ensure employers / Apprentices remained where possible with the existing sub-contractors to ensure continuity in training and delivery and these arrangements have continued. This delivery involved some providers delivering off the job Diploma elements only (where this is a combined NVQ / Diploma qualification), together with assessors from EAS Mechanical Limited & Electrical Assessment Services UK Limited (as well as these two providers delivering frameworks), who LCB also contracted with directly, for the assessing of competence elements as appropriate.
