

## Progression Routes for Apprentices

### Plumbing

If you are currently studying at Level 3, you could stay at Leeds College of Building and study our HNC/HND in Construction & Built Environment (Plumbing).

You can develop your skills by taking further training in areas like heating, ventilation and air-conditioning, and renewable energy technologies like solar powered heating.

You can also join the [Gas Safe Register](#) or get certified with the [Oil Firing Technical Association \(OFTEC\)](#). These would show you're qualified to work on gas or oil-fired appliances.

You could go on to study for a higher national diploma or degree and become an engineer. This could lead to career options in building services engineering, estimating and contract management.

**Remember, you do not have to go on to study higher education straight away, you can go into employment and consider HE at a later point in your life, if and when you want to open up your career options.**
