Quantification and reporting methodology

We have followed the 2019 HM Government Environmental Reporting Guidelines. We have also used the GHG Reporting Protocol – Corporate Standard and have used the 2020 UK Government's Conversion Factors for Company Reporting.

Intensity measurement

The chosen intensity measurement ratio is total gross emissions in metric tonnes CO2e per pupil, the recommended ratio for the sector.

Measures taken to improve energy efficiency

All capital projects have sustainability as a consideration. Projects this year have included LED lighting in over 40 classrooms and the viability of new, more efficient heating system. Local companies are used for works where appropriate to reduce distances travelled.
